

Mirabela Medallon

full stack developer & designer / <http://miraabela.github.io> / mirabelamedallon@gmail.com

Education

B.S. Computer Science — University of Hawaii at Manoa — **GPA 3.8 / 4.0** — Graduation: 2021

Skillset

Front End: JavaScript, React, TypeScript, Next.js, Redux, Angular, HTML, CSS, Sass, CSS-in-JS, React Native

Design & UI Frameworks: Adobe Illustrator, Photoshop, Bootstrap UI, Material UI, InVision, Figma

Back End: Node.js, Express, Mongoose, MongoDB, Python, Django REST Framework, PostgreSQL, AWS SDK

Other: Docker, Github, Jira, Trello, Cypress Automated Testing, Web Scraping, ESLint

Experience

Booz Allen Hamilton — **Software Engineer Full Stack** — 01/22 to Present

- Develop functional, data-driven web applications & reusable components in React, Next.js, Angular, TypeScript
- Design and implement endpoints for a REST API in Node Express.js connected to MongoDB
- Implement role based authentication, protected routes, user and role management with JSON Web Tokens
- Document API request and response data structures with Swagger UI
- Configure multi container apps for development & production with Docker and nginx in AWS EC2
- Other backend features: use GeoJSON for geospatial queries on a map, uploading to AWS S3 buckets
- Develop web scrapers in Python to collect data for use in AI model training
- Create data visualizations in Kibana, D3.js, and maps with Leaflet.js
- Design mockups for new features in Adobe Creative Suite - Photoshop and Illustrator
- Communicate with stakeholders, designers, & backend developers to incorporate feedback and new features
- Provide ideas on improvement to user experience and user interface, then implement ideas
- Technologies: React, Next.js, Angular, TypeScript, Python, Flask, Elasticsearch, Kibana, D3.js, Node.js, Express, MongoDB, Mongoose, Docker, Bootstrap, Material UI, ESLint, AWS, Github, Leaflet.js, Jenkins, nginx

Fambloom — **Full Stack Developer (Pro Bono)** — [\[Link\]](#) — 09/21 to 11/21

- Owned full software lifecycle from end to end. Developed frontend and backend. Technologies: Docker, React, Bootstrap UI, Django, Django REST Framework, Python and PostgreSQL. Deployed using Heroku.

Loko I'a Pā'āiau — **Web Developer (Pro Bono)** — [\[Link\]](#) — 09/21 to Present

- Developed and deployed entire website with React, Next.js, Bootstrap UI, Strapi Headless CMS, Vercel

UH IT Services — **Front End Developer** — [\[Link\]](#) — 03/21 to 08/21

- Evaluated & fixed UI bugs at different breakpoints & Accessibility bugs in the code. Ensured app to be ADA & WCAG Compliant. Technologies: AngularJS, Java Spring Boot, Bootstrap, axe Devtools, Lighthouse

UH Collaborative Software Development Lab — **Software Developer** — [\[Link\]](#) — 10/19 to 03/20

- Created a project from inception: conducted user requirements survey, wrote system design, diagrams, implemented UI, wrote web scraper. Technologies: React, Semantic UI, Javascript, Puppeteer, XRay, Cheerio

University of Southern California — **Undergrad Data Science Research Intern** — [\[Link\]](#) — 06/19 to 08/19

- Created a project for data collection (web scraping & data cleaning) and data analysis (natural language processing). Technologies: Python, NLTK, pandas, NumPy, Scikit-learn, Scrapy

FloWater Inc — **User Experience & User Interface Design Consultant** — [\[Link\]](#) — 09/19

- Designed product structure (IoT mobile app - client side) based on the product goals & desired features.
- My work was presented at the Microsoft and Changhong booths at the CES 2020 convention. [\[Link\]](#)

KCC STEM Center — **Web & Graphic Designer + Computer Science Tutor** — [\[Link\]](#)

- Completely redesigned & rebuilt the website to be more user-friendly and organized. — 09/18 to 04/19
- Tutored students and resolved problems in Java, C, C++ & Discrete Math assignments. — 01/18 to 05/18

Awards, Activities, Projects

1st Place 8 times, Runner-up 12 times — **Online Graphic Design Contests** — [\[Link\]](#) — 99designs.com

- Created winning designs for startups based on their product goals and target market with Adobe CreativeSuite.

State of Hawaii Annual Code Challenges (Hackathons)

- 2021 — [\[Link\]](#) Developed a mobile app that is part of a system for data collection of Hawaii's protected animal sightings and distress calls. Technologies: React Native, Meteor, Mongo, Google Maps
- 2019 — [\[Link\]](#) Co-led a team of 5. Gathered requirements, created system design docs and UI mockups. Developed the entire front-end (all screens) of the mobile app. Technologies: React Native, Google Maps
- 2018 — [\[Link\]](#) Created a streamlined data collection, reporting, and data visualization solution for Hawaii's Dept. of Land & Natural Resources in a team of 4. Programmed the front-end of the website and part of the Android app. Technologies: Android Studio, Java, HTML, & CSS.

Co-Founder of SWITCH (Supporting Women in Tech & Computing Hawaii) — [\[Link\]](#) — 10/19 to 06/21
